MVI AudioVisual
conference automation

MVI AudioVisual provides the next generation hybrid conferencing solution for Bosch DICENTIS conference systems

Full digital voting support for remote participants

Certificate Authority approved TLS1.2/1.3 connections

Speech time support for groups and individuals

Automatically sized mosaic formats

Multiple selectable video outputs

Integration of DICENTIS system and EasyConf Connect remote participants

Fully integrate remote participants using BYOD devices into the current conference or meeting

EasyConf Connect Key Features

✔ Spoken audio from the physical meeting room and remote participants can be heard in high-fidelity by both the hall and remote participants

✔ All remote participants webcams can be shown to the hall permanently in a mosaic view and can be viewed by remote participants

✔ Up to 100 persons can be shown at the same time in an automatically sized mosaic format

✔ Full digital voting support for remote participants and full integration into the conference AV system

✔ Results can be combined with the results from the conference system including group and individual results

✔ During the voting session all remote delegates can be shown in a mosaic-format, including the (individual) voting results. This view can be made part of the video recordings

Remote participants AV stream distributed by the cloud or local AV system

EasyConf Connect gives you the most user-friendly way to allow remote delegates to participate in council meetings. By making the remote participant part of the meeting as if they are physically in the meeting room.

For more information please visit: https://www.mvi-audiovisual.com/bosch-integration-partner-program

Participation
After receiving a digital meeting invitation, remote participants will become fully part of the meeting to which they were invited.

Digital Voting
When a remote microphone is enabled, it's instantly visible and audible to the hall and into the recording to allow quick roll-calling of voting answers.

Distribution
The distribution server software is CA certified and can run locally too. This utilizes your own IT infrastructure; therefore addressing any cloud security concerns you might have.

Security
Full man-in-the middle protection by only accepting root certificate approved certificates and open security standards like AES and SLL/TLS.

About MVI AudioVisual

MVI AudioVisual is a leading solution provider in the automation of conference systems and camera systems.

Since our founding in 2010, we have focused ourselves on designing software solutions for use in meetings where conference systems are used. By listening to our customers and understanding their needs, we are able to develop market-leading software. With 10 years of experience, our solutions for meetings and events are simple to understand and easy to use.

Our solutions are proudly used in the Irish, Mexican, Indian, Hungarian, Liechtenstein and Monaco parliaments. You can find us in different counties and local councils in The Netherlands, Belgium, Germany, Hungary, Finland, UK and more...

Our products are extremely flexible and versatile, in order to suit high profile events like the National Security Summit in The Hague, the NATO Summit 2016 in Brussels, the NATO Military Committee Conference 2019 in Ljubljana and 2020 Croatian EU Presidency.
